

Solve Your Weight Loss Dilemma

Simply put, obesity is a big problem. In fact, health experts worldwide view it as the most serious public problem of the 21st century, as it is a primary contributor to a wide range of other conditions including cardiovascular disease and diabetes.

Like most people, you've probably tried dieting many times, and you know how difficult it is to not only lose weight, but keep it off as well.

The problem with most diets is that they deny you the satisfaction of enjoying food. When you feel deprived, it's virtually impossible to effectively lose weight for the long-term. Sooner or later, you'll give up and give in, overeating until you gain back any weight you lost—and possibly more. This vicious cycle is often called "yo-yo" dieting, and it's the top complaint of those trying to lose unhealthy weight.

Finally, there's a product that works. A product that supports your body's natural weight control mechanisms on every front. A product that's safe, proven, and that delivers real results.

Introducing *Vísi* Weight Loss.

Vísi Weight Loss: The Perfect Weight Control Solution

Vísi Weight Loss is an all-natural formulation that promotes optimal weight control without the jitters, hunger or confusion of other weight loss products and programs.

Featuring our proprietary Scandinavian Gold Blend, this proprietary formula is designed to support the body's weight control efforts on three major fronts—appetite suppression, thermogenesis and the conversion of body fat.

What's In Vísi Weight Loss?

- **Scandinavian Gold Blend:** Features the potent antioxidant properties of the Arctic Cloudberry and Lingonberry, which support natural energy metabolism. Also includes Garcinia Cambogia (HCA) a well-known botanical that suppresses appetite, inhibits fat production and does not stimulate the central nervous system
- **Green Tea Extract:** Contains powerful antioxidants, enhances the process of thermogenesis, increases the rate of metabolism of fat without increasing heart rate—all without jitters of anxiety. Green tea also prevents inflammation and controls blood sugar levels
- **Geranium Oil Extract:** Assists with mental clarity, relieves stress and enhances mood
- **L-Carnitine:** An amino acid that helps the body turn fat into energy and boosts brain function

- **Garcinia Cambogia (HCA):** Suppresses appetite by redirecting calories away from fat production and towards the formation of glycogen. Glycogen is the stored form of glucose, one of the body's primary sources of energy
- **Rice Tea Leaf:** New to market botanical that contains strong appetite suppressing properties

The Power of the Scandinavian Summer

Intense, concentrated and filled with extremes in light, power and sun, the Scandinavian Summer infuses the region's native plants with an unmatched potency of Nature's goodness. After having spent many months in harsh conditions and frigid temperatures, these plants—particularly the Arctic Cloudberry and Lingonberry—soak up the Nordic energy and sun with mystical speed. The extremes in temperature, climate and season endow these berries and plants with far more nutritional potency than most others found on the planet.

Arctic Cloudberry & Lingonberry: A Potent Nutrient Combo

At the heart of VÍSI Weight Loss is its proprietary Scandinavian Gold Blend, which features two particularly remarkable berries.

The Arctic Cloudberry, also called "Scandinavian Gold," boasts a stunning nutrient and benefit profile. It is rich in vitamins A, C, E, B1, B2, B3 and B6, as well as calcium, magnesium and benzoic acid. The Cloudberry also contains more vitamin E than any other known fruit or vegetable. The seeds of the Cloudberry also contain fatty acids that are crucial for numerous body organs and systems.

The Lingonberry also has astounding properties. It contains high levels of organic acids, vitamins C and A, B vitamins, potassium, calcium, magnesium and phosphorous. This berry also boasts rich reserves of flavonoids, lignans and resveratrol. It has been used in Europe for centuries in a variety of traditional uses ranging from gastrointestinal upset to joint discomfort.

What Does the Science Show?

Hundreds of studies have been conducted on the ingredients in VÍSI Weight Loss. In fact, researchers from Finland recently found that three of the primary berries in VÍSI Weight Loss possess significant cell-protective properties:

"[Cloudberry, lingonberry and vikingberry] seem to have great potential as a source of chemopreventive components."

– Asia Pac J Clin Nutr. 2008; 17 Suppl 1:123-5

How Can VÍSI Weight Loss Help You?

- 1. Is 100% Natural:** All of the ingredients in Weight Loss are all-natural, and there are no synthetics, harsh chemicals or fillers.
- 2. Suppresses Appetite:** The proprietary blend of ingredients Weight Loss help subdue appetite and cravings, which encourages lower calorie intake.
- 3. Higher Thermogenesis Rate:** The green tea in Weight Loss is a powerful thermogenic herb that stimulates the metabolism of fat.
- 4. Metabolizes Stored Fat:** Our unique ingredient profile encourages the body to metabolize already stored fat.
- 5. No Caffeine:** Unlike most products that have 200 mg or more of caffeine, Weight Loss has zero added caffeine. This way, there's no jitters, nervousness, adrenal fatigue or other side effects.
- 6. Manages Stress and Mood:** The unique formula in Weight Loss aids the body in normalizing its stress response—less stress means lower weight.
- 7. Encourages Mental Clarity & Focus:** The antioxidants in Weight Loss can protect the brain and boost mental energy.
- 8. Provides Superior Antioxidant Protection:** Oxidative stress is caused by the cellular damage inflicted by free radicals. Weight Loss neutralizes free radicals and protects the body's cells and tissues for overall health.

How to Use VÍSI Weight Loss

Take one (1) capsule daily, either in the morning on an empty stomach or one (1) hour before lunch. If additional benefits are desired a second capsule may be taken.
